

AIM:

First Palindromic String in an Array and find its completeness

```
1  #include <stdio.h>
2  #include <string.h>
3  int main() {
4      int n, i;
5      char a[20][50];
6      printf("Enter number of strings: ");
7      scanf("%d", &n);
8      printf("Enter strings:\n");
9      for(i = 0; i < n; i++)
10         scanf("%s", a[i]);
11     for(i = 0; i < n; i++) {
12         int left = 0;
13         int right = strlen(a[i]) - 1;
14         int flag = 1;
15         while(left < right) {
16             if(a[i][left] != a[i][right]) {
17                 flag = 0;
18                 break;
19             }
20             left++;
21         }
22         if(flag == 1)
23             printf("First Palindromic String: %s\n", a[i]);
24     }
25 }
```

Enter number of strings: 4
Enter strings:
ammu
amma
nana
mam
First Palindromic String: amma

RESULT:

First Palindromic string in an array has been found successfully.
